

John

I Release 7

A Cataloging templates - program for
The wof, provide prompts for keying-in records.

B. ^{2B} We are allowed 5 - define:

1. full^m all fixed fields

020, 008, 100, 245, 250, 260, 300, 504, 4xx,
650's, 700

2 Serial all fixed fields

008, 022, 1xx, 2xx, 24x, 260, 300, 310,
362, 6xx, 780, 785

3. Brief: full except 1, 4, 8 etc.

4. Open for projects (Temp)

5. tape-load (system format)

Uniform titles, do d/p because essentially
will be indexable. don't worry about auth. for

e-mail
any addition
change to
sketch Q.

*

~~B2~~ ~~subst. Ind. on~~

C Y public display eqn -

D G generate for other st. doc

Some OCLC new stream bib

(OCLC not adding st. doc to OCLC, will

do a tape load

new st. - then OCLC (008)

E C Copy name to auth

Some name/subj auth on US/Am. esp copy name

if only subj. delete name after change

G multi

H why?

I can now update subfield - sub-diver

II Rev. of subj index
650 \neq 690 index in subj. index
(other in key word)

III Authority
any on elem. dup records
(also Ag, San Albert do, will
key log in TM - expect to key (M&L key))
* en. comp: can do own acts - USA doc.

IV Interface
* key log for M&L of any problem note

V Data cleaning
B. Only 60 222's left for increased code on order record
(if loc - none, ref - sans)
Shan Q will identify compres + send to be corrected
A 3,000 dup pair left San S will work on them
~~But~~ (Jan 28 - Feb 16, May 91 worst.)
92

VI Vac Pac.

not detail create histo must send entire database ~~order~~ ^{order} range of #'s
except UMO

Tri-downloads hit records when ordering
print gone is a problem (can check in on other record)
can't see en. other order records

UMS all records hang off hit?

idem - add / dis. mail to M&L

will have own logics public won't be able to see ship-plan

en. comp will have own range of order #'s use
for fund reports, pay files

* mail M&L a list of all our hits

* Don't Transfer a Me.
suggestion on the Transfer to merge

VII Mult. item / loc

can do 3 = if don't add type on 2d, 3rd.
1st $ic * rcs = b; b1 = b; b2 = ; b3 = ; bn = ; i = / ty / loc;$
2d $i = / cty = 2 / stam = 0 / loc = ;$ (loc last)

VIII Per bit

* when exact, add a date

(b/c w/ order + v-in for judgment. More, loc bit is suggest
if add. exact, change a judgment bit will
overly the More w/ Non-More

ex. Me same

car date deat / into link

* if find any, put a date date in
OV with. More
send e-mail to MZ as you cannot
so she can keep log

IX Purge

A copy ^{Purge}

when cut a copy, input 2 in loc
me will be purged in regular purge ^{key-}
^{suppression}

Doc Rephrased page See V. B 3 p12 (coll more)
refers to exception cited, not new in USA V.F.
On Texts & procedures -UCI
but any eqny ok.

~~B. V. C.~~
~~add +~~

X Microform clarification

OCLC 2 diff records my + mas

only of [cinema] - d/l my record
[old books]

gd.
he
+
mf.

if mf, he on the way, add
at Aug

public access - how show loc.

O-sub loc

gd
~~gd~~ gdm

if own mf, he on OCLC, download he

print
-mono

* he is 1st choice (if both)

if only, 1st mf - add he + ov.

add ~~usage~~ ^{usage} for non-serial to Document of CSC;
of format

accept minutes amend - add mat.
