40	Notes--URSUS Statistics:															
41	1) URSUS WebPAC statistics are based on connections to the Innovative server as recorded in the search report which compiles both ASCII and WebPAC searches. This report tallies number of searches, not number of hits.															
42	* Due to technical issues with usage system, data was extrapolated on existing data or averaged based on past usage for corresponding months.															
43	**Digital Collections data based on hits on top level web pages. May not represent total usage from searches from Digital Gateway database.															
44																
45																
46	Notes--Mariner Web:															
47	1) Web statistics for Mariner and UMaine are a compilation of the top 100 URLs receiving greater than 100 hits. Subdirectory totals are not reflected. The increase in usage beginning April 2003 reflects a change in the way data is collected.															
48	2) Web access statistics do not account for cached pages on client machines. We have no way of determining the actual number of page views for top directories.															
49	3) Maine Databases statistics tally the number of users who access statewide databases through the "mainedatabases" portal. This figure does not include access by institutions who use their own portal, e.g. EBSCO.
